Memo to File:

Re: Stauffer Chemical Co.
ACT/047/007

Ron Daniels, Mike Minder and Mary Ann Wright visited this site on December 14, 1978, The Division staff met with Fred Riding, Plant Manager, Tom Scheffel, Chief Mine Engineer and Duncan King, General Manager, of Stauffer Chemical Co. At this meeting, a six page letter, dated November, 15, 1978, was handed to Ron Daniels and its contents were discussed. The letter, concerning requests for some exemptions to Rule M-10, is contained in the file. The company representatives were advised that the Division staff would review the requests and discuss the matter with the members of the Board of Oil, Gas, and Mining.

The second part of the meeting involved a tour of the mining operations to point out areas of difficulty in complying with Rule M-10. These areas are well described in the letter of November 15, 1978.

MARY ANN WRIGHT *mau*
